Grow Que

GROWQUE

MEP PROCUREMENT, SIMPLIFIED

2026 Product
& Solutions Brochure

Saudi Arabia | Built for contractors, facilities teams, developers and procurement professionals

One Platform
Every MEP Requirement

Growque is a digital procurement platform connecting buyers with mep products, suppliers and procurement workflows.
We simplify the process of finding products, comparing supplier options and moving project requirements toward procurement.

Our Core Categories

01

Electrical
Power, protection, distribution, wiring and controls.

02

Plumbing
Pipes, fittings, valves, pumps and drainage

03

Mechanical
Pumps, motors, equipment and mechanical components.

04

HVAC
Air-conditioning equipment, ventilation, air distribution and controls.

What We Bring:

Product Sourcing:
Access essential MEP products

Supplier Comparison:
Compare specs, pricing & lead times

Project Procurement:
BOQs, material schedules & project needs

Local Sourcing:
Supplier options across Saudi Arabia

OUR VISION

To become the digital procurement infrastructure for MEP products across the Middle East.

HOW GROWQUE WORKS

From requirement
to procurement A simple
procurement journey

A SIMPLE PROCUREMENT JOURNEY:

01: send your requirement

Upload your BOQ, EXCEL LIST, PDF, material schedule or simply send a product requirement.

02: source & compare

Growque identifies products and matches suitable supplier options.

03: review quote

Compare specifications, brands, quantities, pricing and lead times.

04: order

Approve the quotation and proceed with purchasing and delivery.

05: track

Keep procurement, delivery and documentation organized.

One workflow

Requirement - sourcing - comparison - quotation - order - delivery

Source

Find suitable products.

Compare

Evaluate available options.

Procure

Move forward with confidence.

Electrical Solutions

Powering projects with the right products.

Growque supports electrical sourcing for residential, commercial and industrial projects.

Protection & distribution

MCB
circuit protection and switching.

MCCB
higher-current protection and switching.

RCCB / RCBO
residual-current protection solutions.

Distribution boards
db, smdb and mdb solutions.

Surge protection
protection against transient voltage events.

Isolators
electrical isolation and switching.

Motor control

Contactors
motor and load switching.

Overload relays
motor overload protection.

Starters
motor starting solutions.

VFDs
variable-speed motor control.

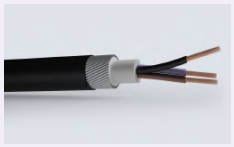

Product range

MCB • MCCB • RCCB • RCBO • DB • SMDB • MDB • contactors • overload relays • VFDs • starters

CABLES, WIRING & CONNECTION

Connecting power from source to system.

Lv power cables

Power distribution cables for buildings and infrastructure.

Copper • aluminium • XLPE

Building wires

Wiring solutions for lighting and power circuits.

PVC • FR • LSZH options

Control cables

For control and instrumentation applications.

Multi-core • shielded • flexible

Flexible cables

Flexible connections for equipment and machinery.

Power • control • industrial

Cable lugs

Termination accessories for reliable connections.

Copper • Bi-metal • compression

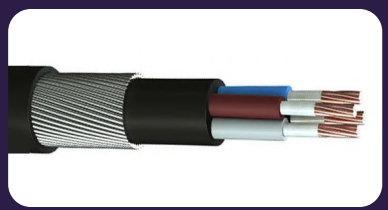

Cable Glands

Mechanical retention and sealing at cable entries.

Brass • nylon • armoured

Plumbing Solutions

Water flow. Built around the project.

Pipes & Fittings

PPR pipes:
hot and cold water distribution applications.

HDPE pipes:
durable piping for selected water and utility applications.

PPR fittings:
connections and transitions for ppr systems.

UPVC pipes:
drainage and utility applications.

Copper pipes:
piping solutions for specified building services.

Valves

Ball valves
on/off flow control.

Check valves:
prevent reverse flow.

Pressure reducing valves:
pressure management.

Butterfly valves:
compact flow isolation and control.

Gate valves:
isolation for piping systems.

Float valves:
water-level control.

Product range

PPR • UPVC • HDPE • copper • ball valves • butterfly valves • gate valves • check valves

Pumps & Water Systems

Keeping water moving.

Growque supports pumping requirements for building services, water management and project applications.

Booster pumps
Pressure boosting for building water supply.

Circulation pumps
Hot-water and hvac circulation.

Sewage pumps
Drainage and wastewater pumping.

Dewatering pumps
Construction, basement and site dewatering.

Pressure tanks
Pressure stabilization for pumping systems

Pump controls
Control panels, level controls, switches and protection.

Pump room requirements

Pumps • valves • controls • tanks • accessories

Submit your pump schedule or BOQ for consolidated sourcing.

Drainage & Sanitary

Designed around flow, drainage & maintenance.

01
Floor drains
Drainage points for wet areas and building applications.

02
Cleanouts
Access points for drainage inspection and maintenance.

03
Traps
Drainage components designed to support water-seal applications.

04
Flexible connectors
Flexible connections for plumbing installations.

05
Manhole components
Components supporting drainage access and infrastructure.

06
Drainage channels
Channel drainage solutions for suitable building and site applications.

Plumbing Project Packages

Water supply
Pipes • fittings • valves • accessories

Drainage
uPVC • HDPE • drainage components

Pump room
Pumps • valves • controls

Tanks
Tanks • float valves • connections

Boq procurement
Upload • compare • order

HVAC Solutions

COMFORT, AIRFLOW & CONTROL

AHU

Air handling units for commercial building applications.

AHU • filters • coils

FCU

Fan coil units for zone-level air conditioning.

2-pipe • 4-pipe • controls

Fans

Ventilation and exhaust air movement solutions.

Inline • axial • centrifugal

Air extraction for toilets, kitchens and service areas.

Wall • ceiling • inline

Ventilation units

Fresh-air and heat-recovery applications.

Fresh air • erv/hrv • controls

Thermostats

Temperature control and hvac accessories.

Digital • room • programmable

AIR DISTRIBUTION

Moving air where it matters

GI ducting
Ductwork for hvac air distribution systems.

Flexible duct
Flexible connections for selected air-distribution applications.

Diffusers
Air distribution terminals for conditioned spaces.

Grilles
Supply and return air terminals.

Volume control dampers
Airflow balancing and control.

Fire / smoke dampers
Duct-system components for specified fire and smoke-control applications.

HVAC accessories
Duct insulation • pipe insulation • vibration isolators • flexible duct connectors • access doors • louvers

HVAC Controls & Piping

Precision throughout the HVAC system

Butterfly valves
Isolation and flow-control applications.

Balancing valves
Hydronic system balancing.

Control valves
Automated flow control for hvac systems.

Y-strainers
Filtration and protection within piping systems.

Flexible connectors
Vibration and movement management within piping connections.

Air vents
Air release within hydronic piping systems.

Controls
Thermostats • sensors • actuators • controllers

Hvac project packages
Chilled water • ahu / fcu • ventilation • controls • maintenance

MECHANICAL SOLUTIONS

Equipment for building & industrial systems

Pumps
Water, hvac and utility pumping solutions.
End-suction • inline • vertical

Gearboxes
Mechanical power transmission components.
Helical • worm • industrial

Mechanical accessories
General mechanical project components.
Fasteners • supports • consumables

Motors
Electric motors for pumps, fans and machinery.
IE ratings • TEFC • accessories

Compressors
Compressed-air solutions for service and industrial applications.
Rotary • reciprocating • accessories

Expansion joints
Flexible piping connections and movement control.
Rubber • metal • flanged

INDUSTRIAL & SITE SUPPLIES

THE ESSENTIALS BEHIND EVERY PROJECT

Fasteners
Bolts • nuts • washers • anchors

Pipe supports
Clamps • hangers • channels

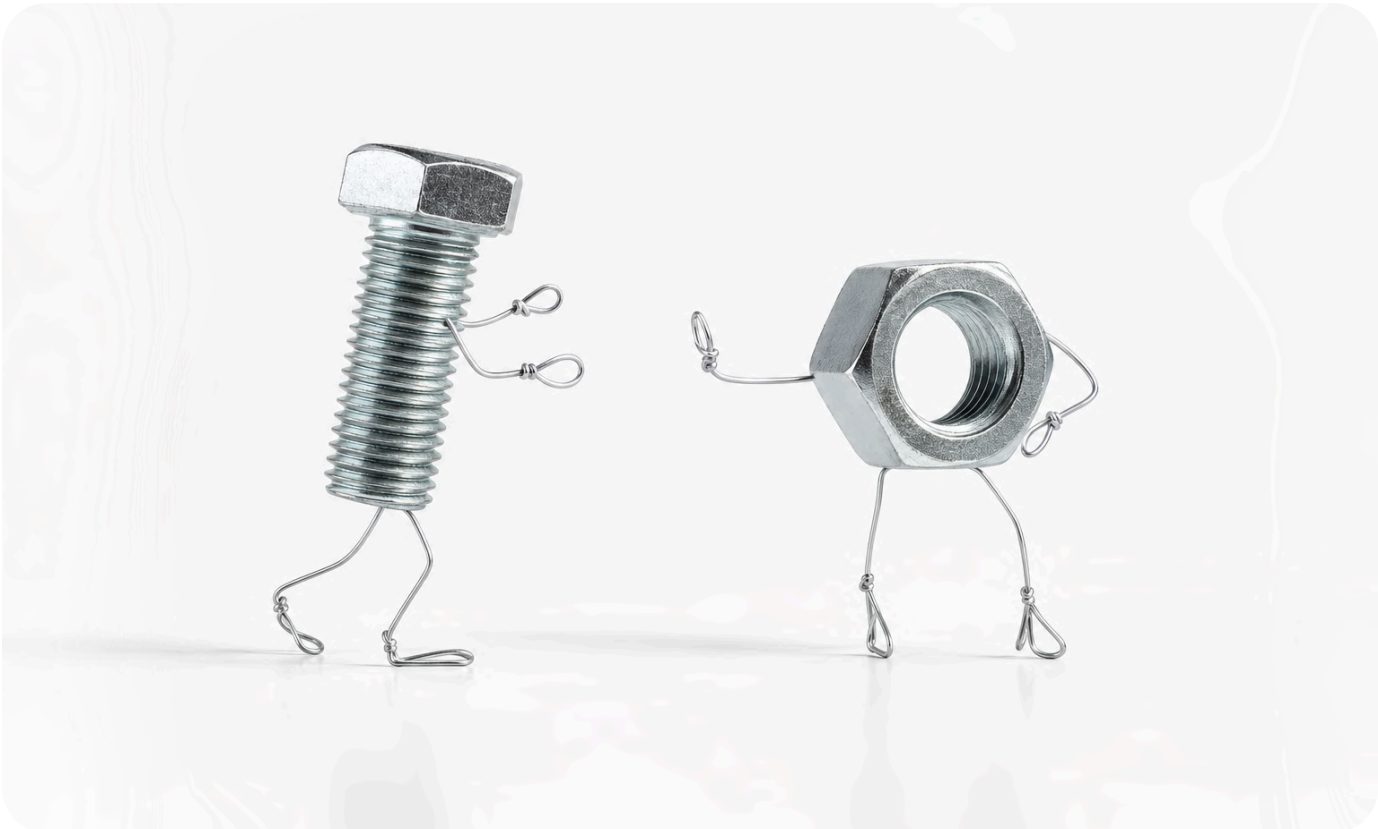

Sealants
Silicone • thread sealant • construction sealants

Gaskets
Rubber • ptfe • spiral wound

Hand tools
Wrenches • pliers • drivers

Power tools
Drills • grinders • impact tools

Site requirements Project-ready supplies for installation and maintenance

Project Procurement Solutions

One procurement workflow for complete project requirements.

Residential
Mep material packages for apartments, villas and residential developments.

Commercial
Office, retail, hospitality and mixed-use mep procurement.

Industrial
Pumps, motors, valves, electrical and maintenance supplies.

Hospitality
HVAC, plumbing, electrical and replacement materials.

Facility management
Fast-moving maintenance and spare-part procurement.

Construction sites
Consolidated site supply with organized rfqs and deliveries

Need a complete project package?

Send your:

BOQ • drawings • material schedule • project specification

Receive support for:

Sourcing • comparison • quotation • procurement

From BOQ to Procurement

Turn complex requirements into a clear sourcing workflow.

01. BOQ mapping
Structure project line items into clear product requirements.

02. product identification
Match requirements with suitable product categories and options.

03. alternative products
Identify suitable alternatives where required, subject to project specifications and approval.

04. technical documentation
Organize relevant product and manufacturer documentation.

05. supplier comparison
Compare suitable supplier options.

06. project consolidation
Bring multiple material requirements together into one organized procurement workflow.

Your project data

BOQ • excel • pdf • drawings • specifications - Growque procurement workflow - Products • suppliers • quotations • delivery

Brands & Supplier Network

Multiple sourcing options. One procurement workflow

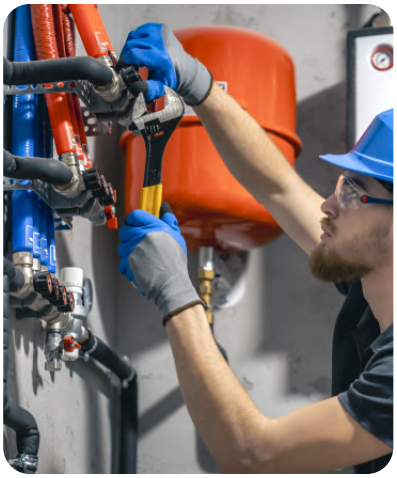

Growque is building a broad supplier and manufacturer network across key mep categories.

Electrical

Schneider electric, ABB, siemens, legrand, eaton, hager, Pumps, Grundfos, WILO, KSB, HVAC, Danfoss, belimo, honeywell

Other categories

Lighting
project-approved international and saudi suppliers.

Plumbing
project-approved pipe, valve and sanitary manufacturers.

Mechanical
project-approved pumps, valves, motors and accessories.

Sourcing flexibility

Additional makes, models and project-specific specifications can be sourced on request.

Brand names are examples and do not indicate current growque authorization, distribution rights or stock availability. Availability and approved makes are confirmed per quotation.

THE FUTURE OF MEP PROCUREMENT

Procurement should become intelligent, not just digital.

Growque is building toward an intelligent procurement ecosystem that can understand project requirements and organize the procurement journey.

BOQ / EXCEL / PDF	Product identification + normalization	Structured material list
Specification	Compliance + alternative matching	Suitable options
Supplier network	Price + stock + lead-time matching	Supplier comparison
Project schedule	Demand + delivery planning	Procurement priorities
Purchase history	Predictive recommendations	Smarter repeat orders

OUR GOAL

You describe what the project needs. Growque organizes the procurement journey.

From Vision to Market Leadership

Building the #1 mep marketplace in the middle east.

Foundation
MONTHS 1–3

Market research • business model • supplier onboarding • core team • website mvp • legal & compliance

Mvp launch
MONTHS 4–6

Platform launch • core mep categories • payments & logistics pilot • early customers • ux improvement

Expansion
YEAR 2

Gcc expansion • advanced search • ai recommendations • project procurement • logistics • b2b programs

Leadership
YEAR 3

Regional leadership • private label • data analytics • demand forecasting • operational excellence

Innovation & scale
YEAR 4 & BEYOND

Ai automation • international markets • strategic partnerships • sustainability • mep ecosystem

Our vision

To be the most trusted and preferred mep marketplace in the middle east and beyond, driving the future of smart procurement.

READY TO SOURCE YOUR NEXT MEP PROJECT?

One requirement. One procurement Workflow.

Why growque?

More choice
multiple product and supplier options.

More value
better visibility across procurement options.

More reliability
organized sourcing and supplier comparison.

More success
less procurement complexity. More focus on project delivery

Send your requirement
